DETAILED ACTION

Election/Restrictions

1. Claims 1-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the paper filed 6/13/2003. Applicant has also elected silica aerogels as the particle species, and species I for filling the voids.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the

subject matter which the applicant regards as his invention.

- 3. Claims 11, 14 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- a) Claims 11, 14, 17: <u>aerogel-like</u>, <u>other metal oxide aerogels</u>, and <u>etc.</u> are all vague in their meanings are not clear.
- b) Claim 14: the three lines starting with <u>powder impregnated fabrics...</u> does not appear to belong in the claim.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 10-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01 / 06054.

'054 teaches applying nanobeads or nanoparticles of 1-1000 nm diameter (7:27-33) of a polymeric shell or three-dimensional network (1:29-2:6) (i.e. a porous material) to fibers.

'054 does not disclose that the fibers are porous with voids, but the fibers of '054 would be inclusive of porous void-containing fibers.

The particle size of '054 overlaps with that claimed by applicant.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
